# Lorem ipsum

Dolor sit amet!

VisualBraille uses 9-dot

Preceded <u>Capital Sign</u> (Alt-h) & <u>Number Sign</u> (Alt-j)

SMOL introduces new preceded Grammar Keying that are not contained in conventional Braille, so that other characters in Unicode can also be mapped

ALT (Alt-t, dagger, only dot 9 is used):

ALT-SHIFT (Alt-Shift-y, double dagger, only dot 3 is used):

Alphabet

abcdefghijklmnopqrstuvwxyz

Old numbers 0 to 9:

New numbers 0 to 9:
